Runway Intersection Marking

**Technical Design Aspects**

- **Marking Geometry**
  - The runway intersection marking will start at the runway hold line and continue to the runway incursion.
  - The marking will start at a 30° angle from the hold line and will be 15 feet wide.
  - The marking will be 60 feet long.
- **Design Implementation**
  - The design will be implemented in stages.
  - The area of the marking will be taken from the CAD model.
- **Cost Estimation**
  - The total cost of the marking implementation is $11,705.75.
